SYNERGY OF ARTIFICIAL INTELLIGENCE AND HUMAN EXPERTISE

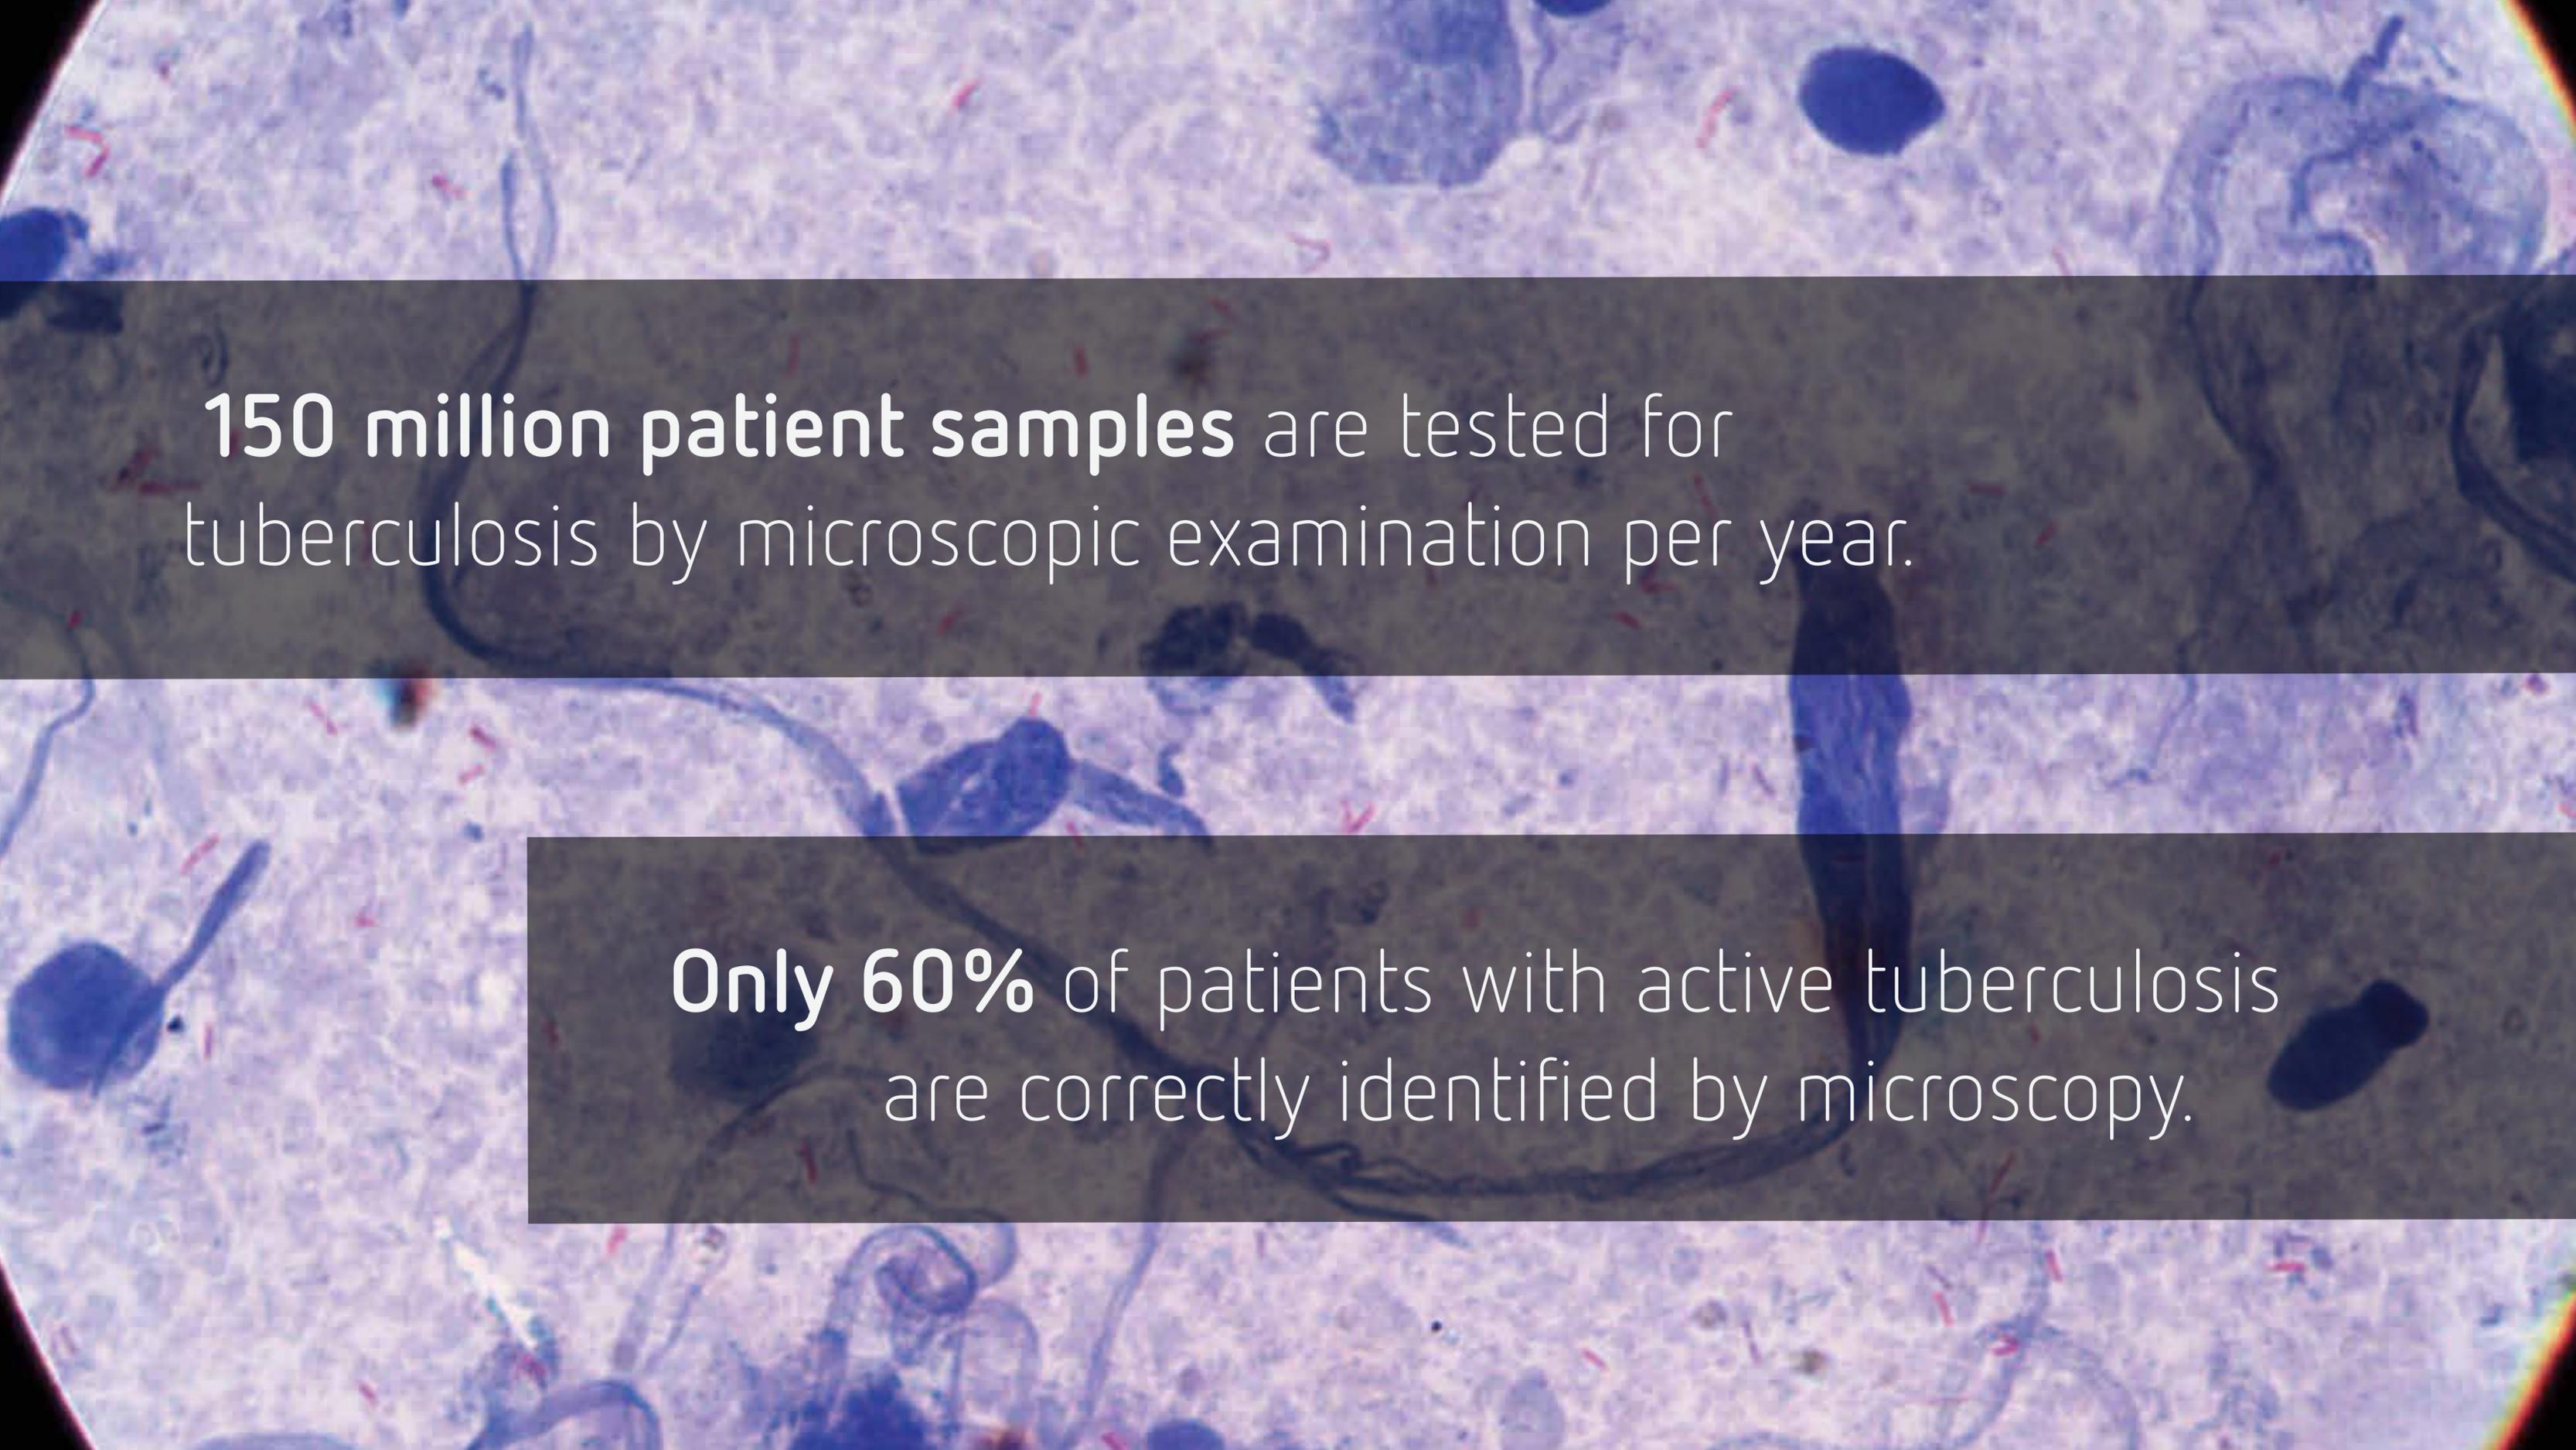

SYNERGY OF ARTIFICIAL INTELLIGENCE AND HUMAN EXPERTISE

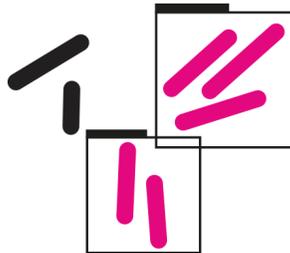

150 million patient samples are tested for tuberculosis by microscopic examination per year.

150 million patient samples are tested for tuberculosis by microscopic examination per year.

Only 60% of patients with active tuberculosis are correctly identified by microscopy.

AI-ENABLED MICROSCOPY FOR RELIABLE, STREAMLINED DISEASE DIAGNOSIS

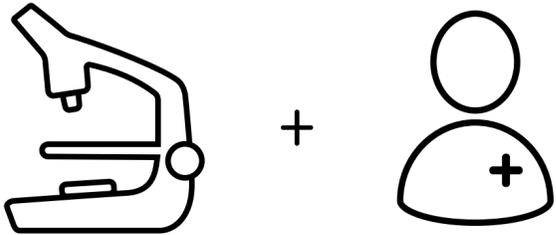

AI-enabled image analysis

automated light microscopy

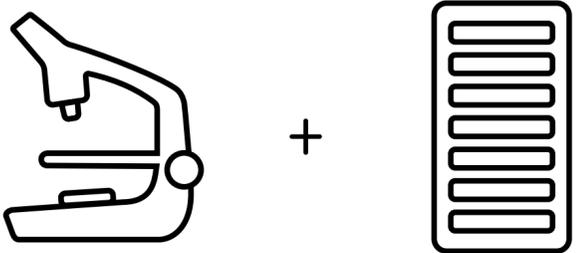

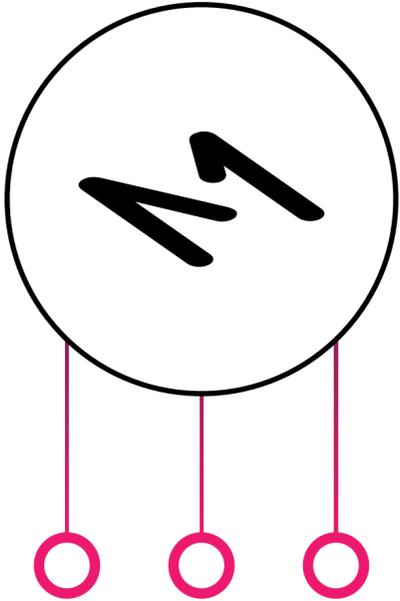

- compact
- fast
- affordable
- reliable

THE SWEET SPOT BETWEEN MANUAL AND FULLY AUTOMATED WORKFLOWS

manual

work intensive

fully automated

cost intensive

cost efficient hardware + intelligent software

**100% INTUITY:
SIMPLE HARDWARE CLEVER SOFTWARE**

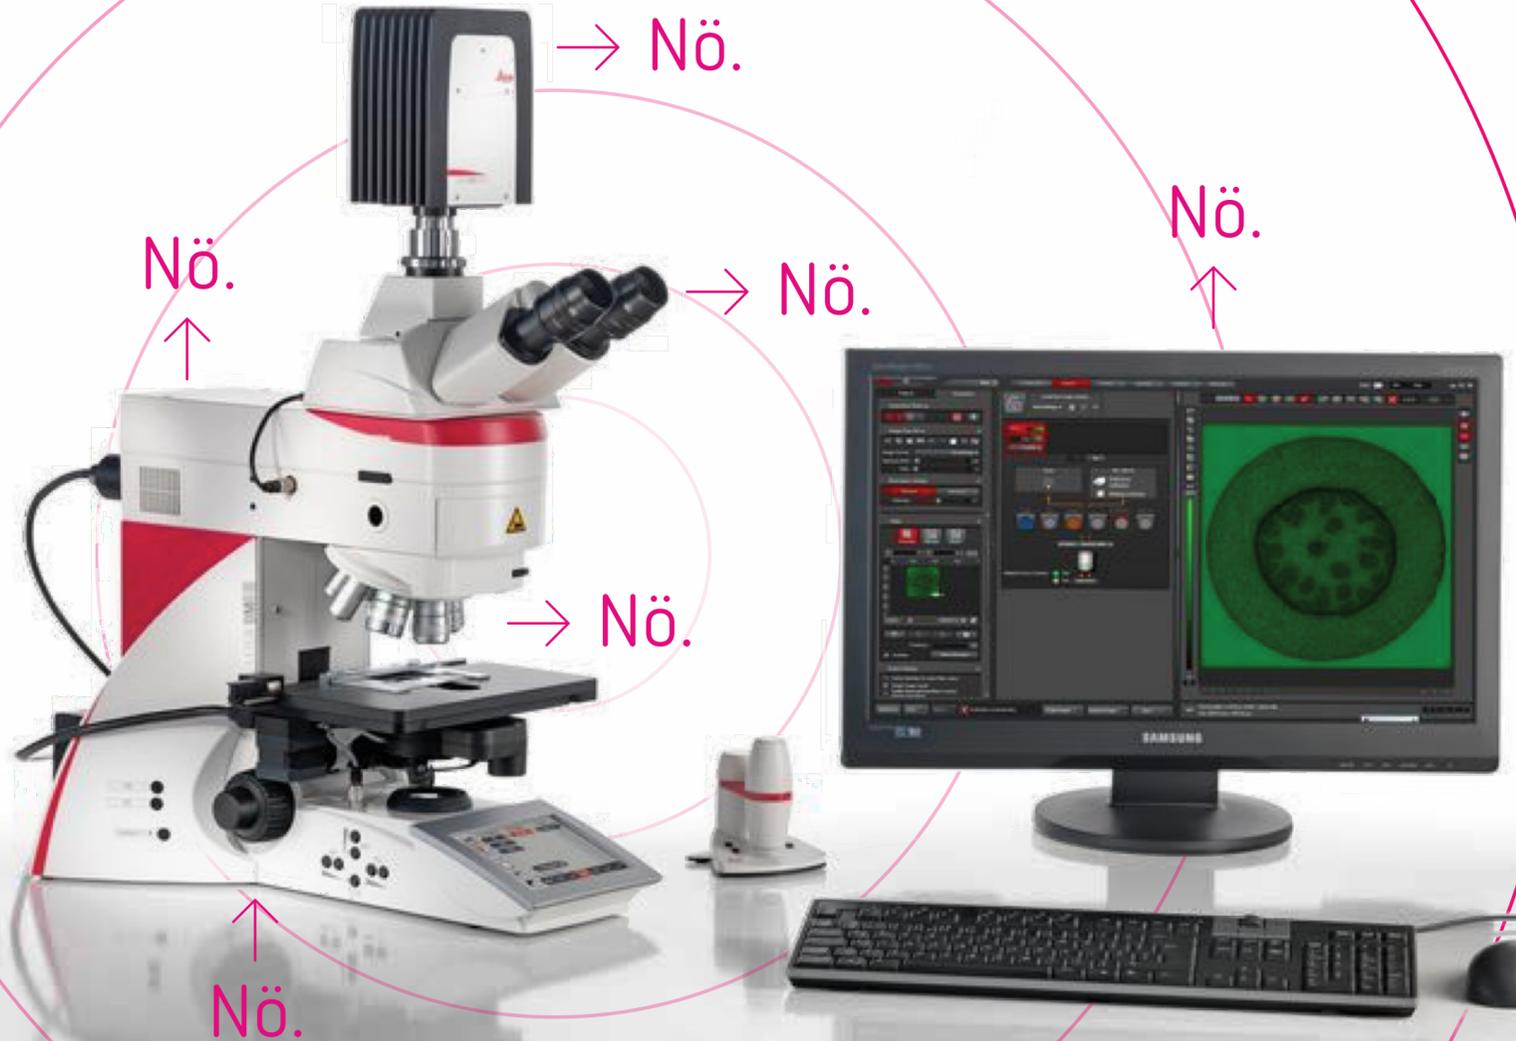

CREATING DESIGN SPACE THROUGH SPECIALIZATION

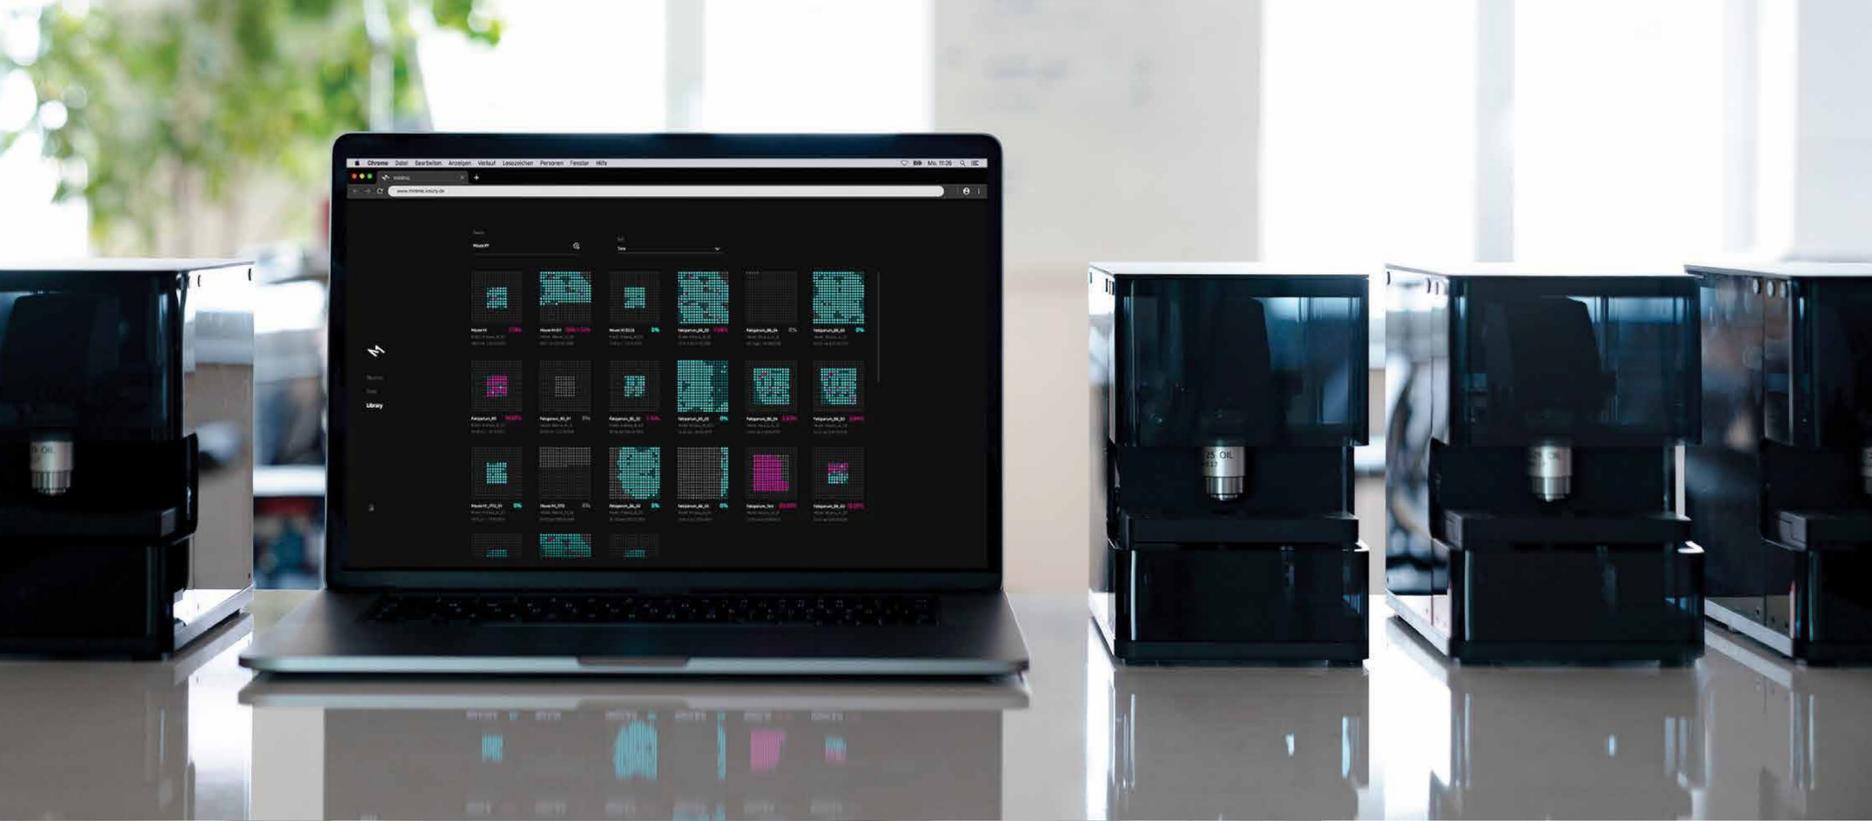

WORKFLOW-CENTERED

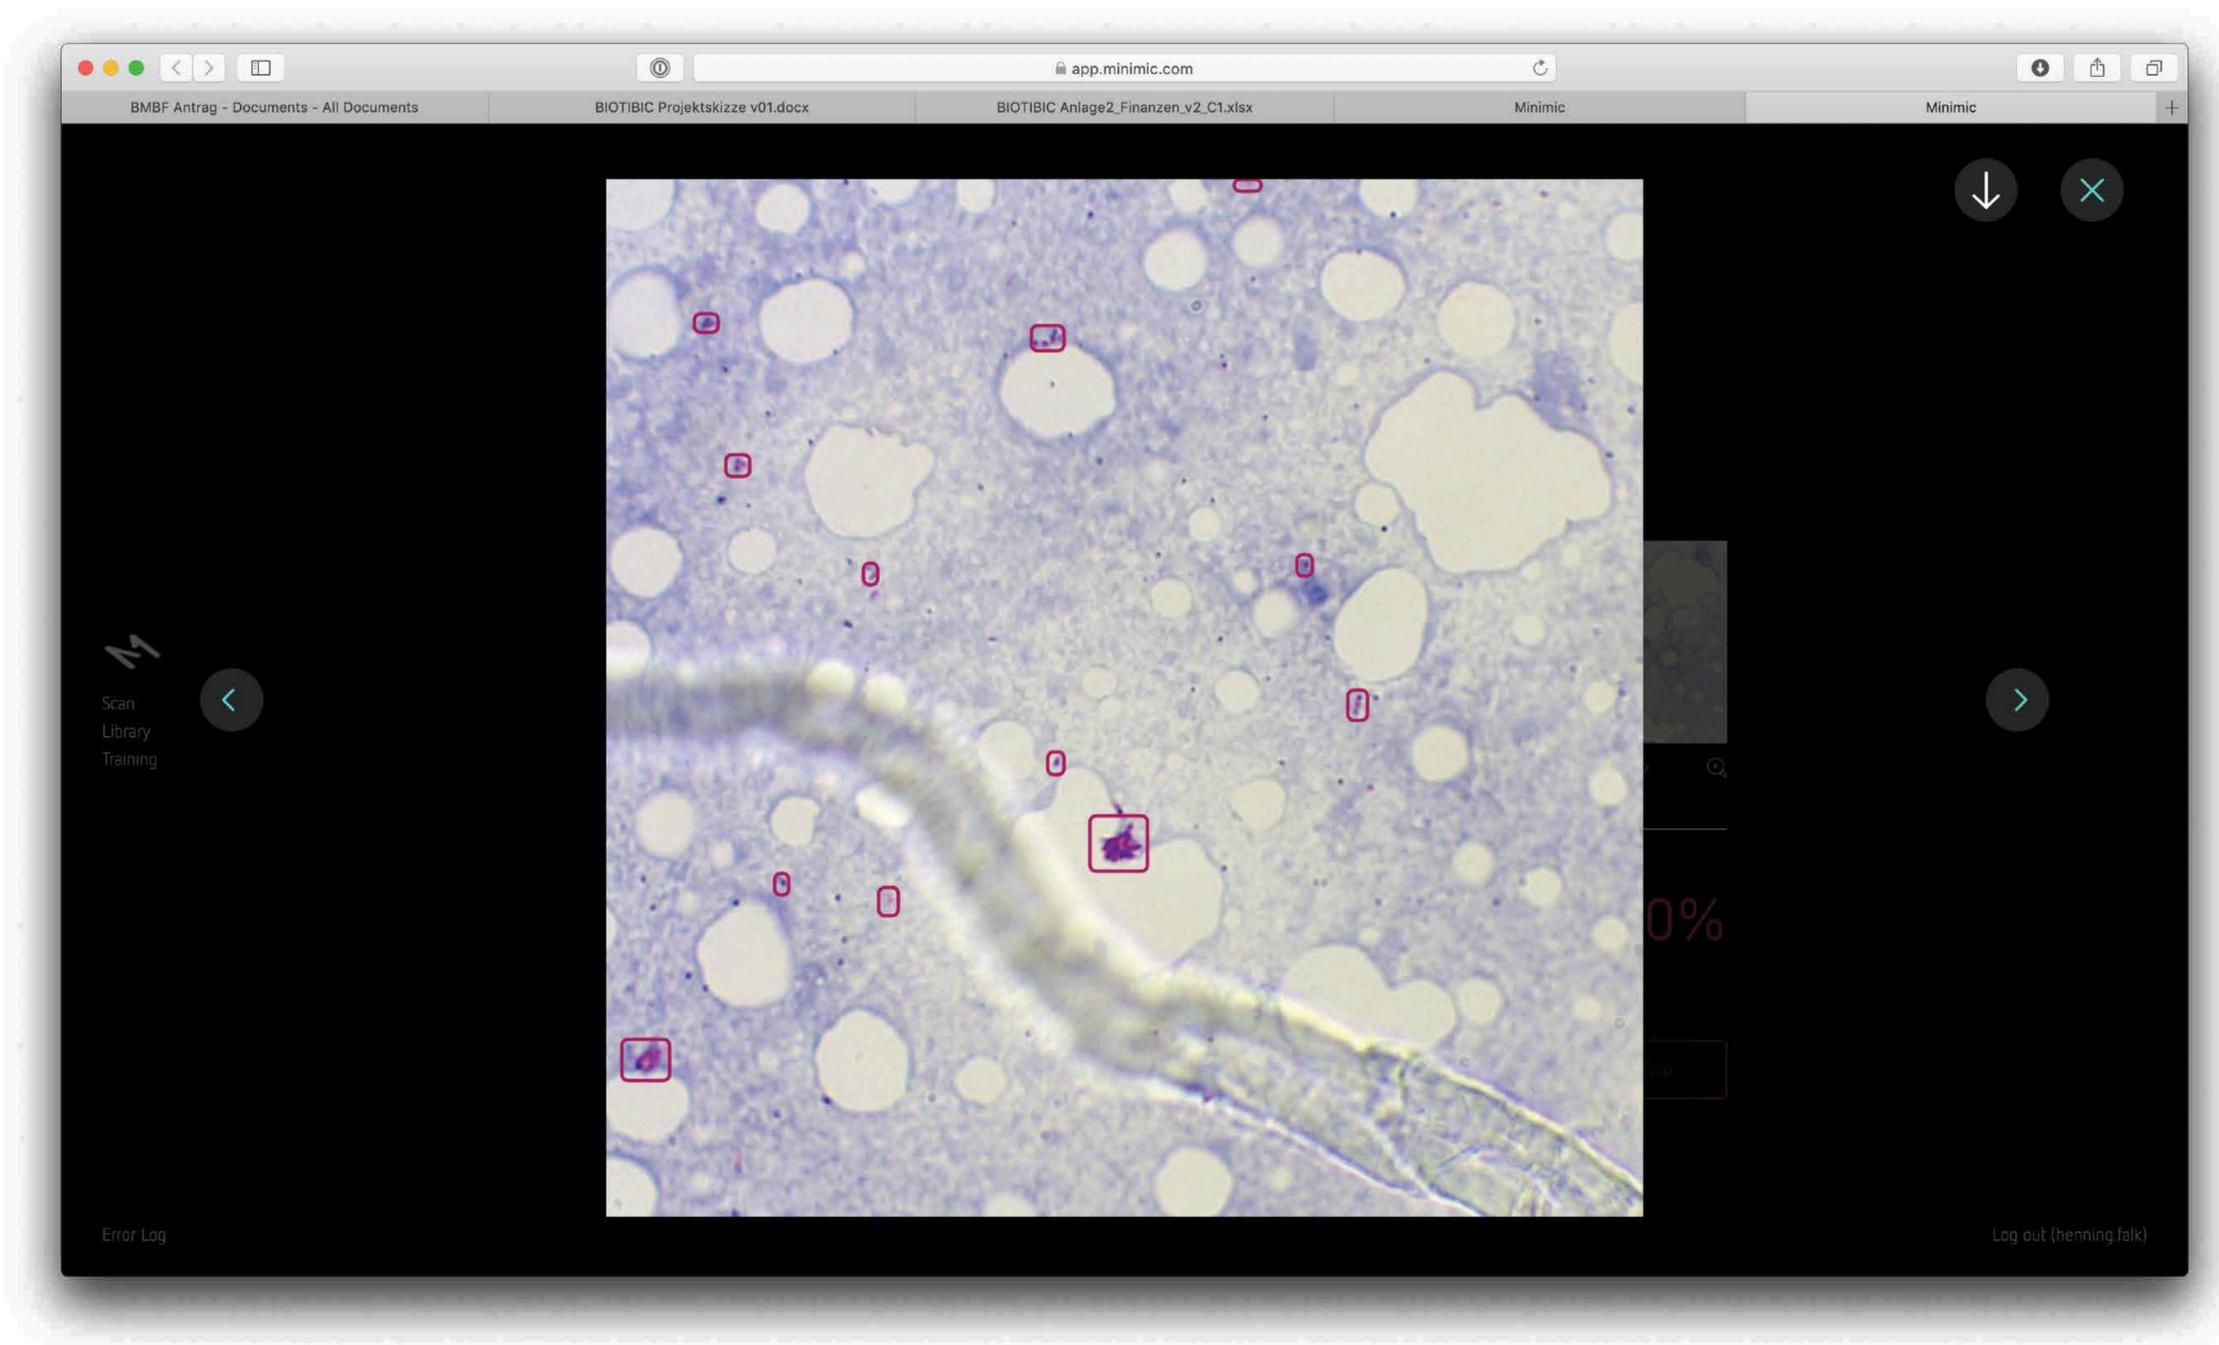

- Digital-only
- Simple optics
- Digital image enhancement
- AI-based analysis
- Digital autofocus
- Vibration tolerance
- Browser-based UI

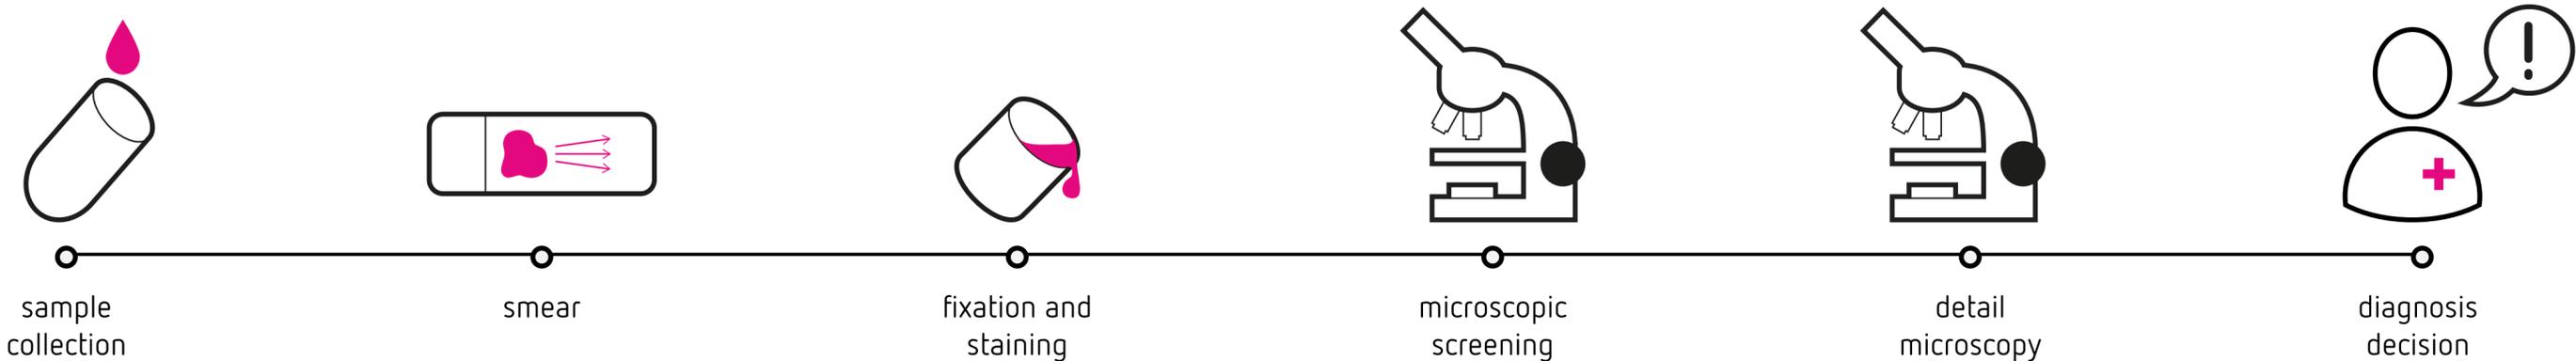

ENGINEERING-CENTERED

TB DIAGNOSTICS: MANY MANUAL STEPS LEAD TO HETEROGENEITY

INTELLIGENT MICROSCOPY FROM SAMPLE TO RESULT

FUTURE POTENTIAL BEYOND TB
